

# Toward Pandemic!

by Gregory Bem

# **Toward Pandemic!**

A chapbook by Gregory Bem

Lone Byte Press 2009  
Philadelphia, Pennsylvania

*After Steve Young: the source and the struggle.*

*After Patrick Lucy: the erasure and the silence.*

The source for this booklet originated through the news service of the A World to Win organization

You can learn more about them at <http://www.aworldtowin.org>

This booklet was written and composed in the Sylfaen digital font.

This booklet wouldn't have been possible without acquired copies of Microsoft Word and Adobe Acrobat.

# **Toward Pandemic!**

*In April and May of 2009 the United States reported a strain of flu, claimed to have originated in swine, was spreading throughout parts of Mexico.*

## *History*

first almost

every

virus was

the beginning

A service is to spread

the swine flu that broke Mexico.

To have caused the last

\*

flues commonly kill

with

the flu

no one.

history has cut  
so many people so quickly

one factor led the most deaths

great many experts  
believe mutation is bound  
to occur later

a senior official  
coordinator for influenza  
said

few

people die

circled in waves

perhaps collapse is based on realities rather than inadequacies; in the face of death the burden of the next will be the developing world; death will be the developing world

they say

to

mutate, it

varied

\*

disease

struck

many

times

nearly every family  
sent through  
every street

\*

“Bring out your dead!”

\*

Care where  
diseases  
are the experience.

exposed to the disease  
a long-frozen corpse revealed  
all human viruses  
serve as a chain

deaths today  
statistical deaths

\*

The figure is dead  
The concluded is the worst

*Possibly*

separate mainly  
the disease  
caused by activity

for pig play  
didn't invent  
vulnerability

The other kind drives  
relations short

Flu being called swine  
something detected  
Pigs mutate, swap

\*

To have come from swine makes swine  
flu the outbreak.

Centered, Mexico City a huge dense

Other

issue

\*

How the diseased humans  
expose the virus

become it

So severe

Mexico is so far

\*

Mexico as infection

at work with swine

Under it  
waves crisis:

so far those killed by the disease  
say the disease affect force

bodies fighting  
disease for treated

following bird flu  
the swine flu  
is the possible

human emphasis on scenario

prediction can be judged

work for catastrophe

today is crisis

poverty not direct

reasons local ships floating coffins  
no cure or effective treatment  
for the mystery care not a  
factor reasons for the people  
they died not understood  
the victim disease not the only  
one who survived looking  
medical

science leaps

It's not clear how a lethal break

Advance preparation could emerge

Power cannot cure

Could prevent systems

The overwhelmed

Comparison today  
is valid.

Inequity is the last  
benefit

Perhaps the best morality  
is a rather damning indictment of  
inequity.

the experience makes it horribly  
clear

especially vulnerable

exi-system points

contemplates  
in the case of the disease

## *A Chinese Memory*

the decisive question to the terms is  
but differences in rates between  
leadership

the people wiped out, disease preyed

mobilization; doubled expectancy;  
restoration of words; power accessed  
the struck; doing everything covered  
rule.

Crucial distinction:  
developing  
and developed

Peril is very different;  
Difference is not just  
development.

Domination:  
most of the rulers dominated  
  
almost everything responds

## *Is Inevitable*

new danger will arise  
under any future.

the point created.

today  
with the problem.
